Overall Goals:

- Showcase progress and implementation around AMR country action plans by highlighting commitments made at the World Health Assembly, FAO and OIE governing bodies WHAs, UNGA HLM, G20 meetings, and World Economic Forum.
- Showcase progress from other industries and partners in the One Health sectors;
- Highlight gaps and announce several new actions, including multi-stakeholder and multi-sectoral commitments;
- Highlight some good practice examples of actions organisations can implement, and get organisations thinking about future commitments; and
- Bring together relevant actors in the AMR field to maintain and build momentum around the AMR agenda and the role of the IACG.

Actions would serve to:

Mobilize new commitments from all constituencies: Governments, the United Nations system, other intergovernmental organizations, international and regional financial institutions, non-governmental organizations and civil society organizations, academic and research institutions, the scientific community, the private sector, philanthropic organizations and other actors - individually or in partnership.
Guidelines for Action statements:

1. Action was launched at or after UNGA High Level Meeting on AMR September 2016.

2. Action follows the SMART Criteria:
   - Specific
   - Measurable
   - Achievable
   - Resource based, with
   - Time-based deliverables

3. Action covers the content areas to:
   - Reduce need and unintentional exposure
     - Human infection prevention and control
     - Clean water and sanitation
     - Animal infection prevention and control
     - Food safety
     - Environment contamination
   - Optimize use of medicines
     - Human use
     - Animal and agriculture use
     - Lab capacity and surveillance
   - Invest in innovations and supply and access
     - Basic research
     - Development of new therapeutics
     - Access to all therapeutics
     - Diagnostic development and access
     - Vaccine development and access
     - Quality

4. Could be actions that act as levers:
   - Raises awareness and capacity building
   - Commits funds and/or financial incentives
   - Focuses on measurement and surveillance
   - Changes policy or regulations
   - Champions or pilots new innovations

5. Could be actions that act as enablers:
   - National Action Plans, system strengthening, aligning with SDGs (including logistics and access)
   - Global roadmap, governance, coordination (including evidence base)
   - Coalition building and political commitment (including data transparency)

6. Types of actions could include:
   - Undertaking concrete action in priority areas and reporting/sharing information
   - Committing to funds or conducting research to close critical knowledge gaps and dissemination of results
   - Enhancements in capacity-building and technology transfers
   - Advocacy efforts to increase awareness on antimicrobial resistance in order to engage and encourage behavioural change
   - Support toward a global development and stewardship framework
   - Committing to organize a meeting on a specific issue and report back on outcomes to a wider audience
   - Sharing best practice
   - Committing to share data on your activities to address AMR and support the IACG global mapping activity

Please share a brief description of your SMART action of no more than 200 words to Samantha Chivers (schivers@unfoundation.org)
