Non-recruiting PhD programmes in science

Active (not recruiting) PhD Programmes in Basic Science

Cardiff University
Integrative Neuroscience

Imperial College London
Molecular and Cellular Basis of Infection
Theoretical Systems Biology and Bioinformatics
Epidemiology, evolution and control of infectious diseases

University College London
Neuroscience, University College London

Interdisciplinary Programme in Structural, Computational and Chemical Biology - University College London, Birkbeck College and The Francis Crick Institute

University of Birmingham
Mechanisms of Inflammatory Disease, University of Birmingham

University of Bristol
Neural Dynamics

University of Cambridge
Developmental Mechanisms, University of Cambridge
Infection, Immunity and Inflammation, University of Cambridge
Mathematical Genomics and Medicine, University of Cambridge
Metabolic and Cardiovascular Disease, University of Cambridge

University of Edinburgh
Tissue Repair, University of Edinburgh

University of Leeds
Molecular Basis of Biological Mechanisms
University of Liverpool
Cellular and Molecular Physiology

University of Manchester
Quantitative and Biophysical Biology

The Dynamics of Cellular Regulatory Networks

University of Nottingham
Antimicrobials and Antimicrobial Resistance - University of Nottingham and University of Birmingham

University of Oxford
Chromosome and Developmental Biology

Immunology, Infection and Translational Medicine

Neuroscience

OXION-Membrane Transport and Disease

Closed PhD Programmes in Basic Science

Newcastle University
Systems Neuroscience

University College Dublin
Computational Infection Biology

University College London
Developmental and Stem Cell Biology

University of Oxford
The Cell in Heredity and Development

PhD Programme at Wellcome Trust Centre for Human Genetics

University of Edinburgh
Cell Biology
University of York

Combating Infectious Disease: Computational approaches in translational science (CIDCATS)
