Open access policy 2020

Our open access (OA) policy is changing.

The new OA policy will apply to any article that includes original, peer-reviewed research and is submitted for publication from 1 January 2020.

It won’t apply to:

- research articles submitted before 1 January 2020 – until then researchers must continue to use our current policy
- monographs and book chapters – we aren’t changing our policy for these, but we are keeping it under review.

The overarching aim of our OA policy is to make sure that knowledge and discoveries resulting from our funding are shared and used in a way that maximises their benefit to health.

We expect our researchers to publish their findings freely online as high-quality, peer-reviewed research articles, monographs and book chapters.

Providing free, online access to published research will:

- maximise the availability and usability of publications
- make sure the research we fund can be built upon.

Our new open access policy is in line with the key principles of Plan S. By publishing this policy Wellcome commits to joining cOAlition S and to work in partnership with other funders to make all research articles open access.

1. All research articles supported in whole or in part by Wellcome must be:

   - made freely available through PubMed Central (PMC) and Europe PMC by the official final publication date, and
   - published under a Creative Commons attribution licence (CC-BY).

2. We will provide grantholders with funding to cover reasonable article processing charges (APCs) for articles published in fully OA journals or platforms that:

   - are indexed by the Directory of Open Access Journals (or follow any other criteria that cOAlition S may set out in future for open access journals and platforms to be compliant) and
   - have an agreement with the National Library of Medicine (NLM) to deposit the version of record in PMC and allow that content to be shared with Europe PMC.
3. We will no longer cover the costs of OA publishing in subscription journals. Grant applicants cannot ask for these costs in their grant application, and grantholders will not be allowed to use their grant funds to pay for these costs.

However, from 1 January 2020 to 31 December 2021, organisations can use Wellcome OA funds for publication costs associated with Jisc Collections transformative OA agreements (or an equivalent), where the agreement allows 100% of research to be published immediately as open access. These costs must be in proportion to the number of OA articles supported by Wellcome.

_We will publish a list of approved agreements before 1 January 2020._

4. We will no longer provide funds for non-OA publication costs (for example, colour and page charges etc).

5. All research articles supported in whole or in part by Wellcome must include a statement explaining how other researchers can access any data, original software or materials underpinning the research, in line with our policy on data, software and materials management and sharing.

6. All Wellcome-funded researchers are strongly encouraged to:
   - post preprints of their completed manuscripts
   - publish them under a CC-BY licence.

7. When there is a significant public health benefit to preprints being shared widely and rapidly, such as a disease outbreak, these preprints must be published:
   - before peer review
   - on an approved platform that supports immediate publication of the complete manuscript
   - under a CC-BY licence.

_We will publish a list of compliant preprint platforms before 1 January 2020._

8. Wellcome is committed to making sure that when we assess research outputs during funding decisions we will consider the intrinsic merit of the work, not the title of the journal or publisher.

All Wellcome-funded organisations must publicly commit to this principle. For example, they can sign the San Francisco Declaration on Research Assessment, Leiden Manifesto or equivalent. We may ask organisations to show that they’re complying with this as part of our organisation audits.

9. Researchers and organisations who do not comply with this policy will be subject to appropriate sanctions. These may include Wellcome:
   - not accepting new grant applications
   - suspending funding to organisations in extreme cases.
